Letter to Greg Procknow

Lettre à Greg Procknow

Eagle Eye

A letter to you! ... (☺)

So hello, humbly & respectfully hi.
Mr. Greg Procknow. So first my -
friend Greg, I just wanted to say
thank-you for the opportunity to
be acquainted & have the degree of our
communication privilege of being able to be
in a way of the way as things are
between us! ... However, I formally would
like to say thank-you respectfully as a - -
person as a person here & as a person as
you are in the way you are in your way of
your desired way of intelligence. So basically
I just wanted to thank-you again for this
way of ways between us a people as people!
However, the best of luck Mr. -
Greg Procknow. as people of people as we
are good-luck in your education & life as
things are for you! Well in the future
if you are ever in need of any-thing of
help feel free to communicate to me by
letter-or-phone-or-in-person or however you
respectfully desire my friend! ... (☺)

See ya my friend Mr. Greg Procknow.
your friend [redacted] (☺)

Oh ya good luck in school if you
need any-thing it's just a thought away.

Bye for now ... See ya!

So hello, so about my personal ways
 of experiences here at the South-
 West Centre for Forensic Mental
 Health. A judge here for myself
 has been in a way as a good
 experience as too the quality of the
 living conditions and the quality of the
 care they provide to me and the
 quality of the character like how
 kind the staff especially the way nurses
 act towards patients and also maybe too
 see a smile and or too comfort someone
 and or too make them feel good. So as
 things are I feel very comfortable being
 here as a person of such ways, however
 also as a person I feel very good as
 a person of such a way. Also I feel good
 about the way of things here at the
 hospital as too everything as of such,
 but again everything is great cause I know
 and I like everyone as too how it is to me
 the people of such ways are here too help
 me and I also know they have my ways
 in the best interest of assisting me in
 ways like helping me get better
 and helping me too feel comfortable
 and helping me understand what and how the
 people of here in the hospital to learn
 what or the way they need and want
 me to learn in the way of such ways.
 So definitely I personally feel in a way as
 a way to trust in the people of this
 hospital to respectfully and in a way of
 a responsible understanding of such as it is,
 so as that said also in other ways this is a
 good place to be so the hospital people can
 definitely be in a way and a place too.

properly be able to help me as they can.
So day-to-day I feel good because of
the day-to-day experiences and the
daily efforts as they help the patients feel
good and comfortable here at the hospital, but
I always feel very trustworthy of the
people here and I trust in them. Also
also relize the endless efforts of the people
here at the hospital, and all-in-all I
feel in good hands here at the hospital. So
as this is how I feel about such ways of an
experiences here at the hospital or at the
South West Centre for Forensic Mental
Health, so moving on so my day-to-day
interactions with myself and patients and the
teams here at the hospital is as follows: so
again basically I day-to-day experiences are
thoughts - as thoughts as daily thoughts, as
I think of things. But as things are my
interactions with the patients are good but
the thing that makes me feel sad and
or negative as a thought is, when a person
or patient is ~~upset~~ upset or negative or
not positive I personally feel hurt in a
sense because I know how they feel as
they go through the thoughts as they are.
Also I feel a loss as they feel and in
the way as they are, so I also when a
person or patient is mad and or ~~not~~ not
positive I get scared and go and hide in my
room until they are not positive. However,
also I personally dislike the negativity of
such circumstances of such and I only hope
for good-positivity as it always should be.
But the things of such is the way it is,
so as I say I personally ~~do~~ do not like
negativity of such ways especially here. + + +

so as that is I really get scared here when
a person gets negative in a non-positive way.
So as my stay here is, for the most part
every-thing ~~is~~ here is good as every-
thing is the quality of care is personally as
it is, however I feel confident that my
needs are being met as good as they can
~~be~~. But you know I feel one way is the
way the hospital people need to help us
understand is how to me is to meet our needs
and to help us understand or to position us or
as patients to realize how to properly know how
to responsibly function as people of way
of understandings to understand things of such
things as a N.C.K. person and of a person to
be the way I feel as we are as different people
other than other people already as fit for the
community. So I feel that from a stand point
of such as a regular person as in a normal way
as to a person as we are, I feel and believe
that the whole thing harder to help someone as
someone that is plagued by a mental troubles
like people here.... Anyways I feel they have
our best ~~in~~ value at heart as to help us see
the tuness of quality and be able to be a way
of a good life, despite our disabilities of
such character. So anyways it complicated
for us, but I feel and think of how complica-
ted it can be for the staff on their end of
the big picture. So also our rooms at the
facility is actually very accomitated if someone
other than our patients actually seen the
accomidations of the way the people who built
our rooms, they I think would be amazed as to
how nice they actually are. The rooms are very
nice as for as to how and what is in them, so
the rooms have there own showers and a desk and

470
things we need. Anyway my choice of topic is a bit off topic so look too essentially on topic my experiences with the patients I feel is a daily-day-to-day experience of social communication of I basically I think it's fellow-ship as family obligation because we are here together as patients. But I feel that our ways here are different as we are different, rather than as normal people. But you know I feel my experience in my room is my safe place to be myself, or to think by myself. So I think better by myself as my thinking is that way. So basically another thing is about my experience here at the hospital in regards to the experiences with my family is very good, and I feel very good because I only have a few family members I am in contact or relations with. So I feel that the way the hospital's accommodations in regards to how they let us see our family's as the structured rules of ways of ways so I feel in that way is good for me because I only have one family member to see. But again I am very happy to be able to have the opportunity to see my family, and also my family member is my approved person as too be able to see her my cousin on a regular basis rather than on a limited basis. So what I feel I would like to tell you is, that if a family member is not a regular approved person the opportunity to go out of the hospital's grounds or off property is limited. So the program is if a person or an ~~patient~~ patient would like to see their family, if they are not in a way as the program's rules the patient may not have such a opportunity to see their family on a regular basis or not as long of a pass in the community with their family.

So basically, as I feel is a great way for the hospital to allow us to see our families is good. I feel respected by the hospital's navigational aspect to accommodate us N.C.R. patients as too our ways of a way of a disability or as a person that is different than others.

You know personally I feel good that there is a place for different people of certain differences, but I am also glad to be a person of such ways as a person of a way as a disabillitee as such. So also as things all here my daily routine is about basically spending most of my days in my room approximately (90) ninety eight percent of my time here in my room, so I can think on my own or be by myself maybe or due to what a diagnosis of such ways.

Also as that is there is alot of advantages of opportunities as to being here as a patient at the South West Centre for Forensics Mental Health Centre, however I always feel very well in the care of the hospital here in S. Thomas. So also because of how long I've been here in the Forensics system as for as some of the functional programs offered here at the hospital, respectfully when I was a newer patient in the hospital system I always was offered to go to the refered programs especially in the beginning of my progress of time as a patient here at the hospital. However, some of the programs here at the hospital are offered to most new patients when I was again new to the system I attended every program that was offered to me here at the Forensics hospital. However, as I was here at the hospital as a patient for many years on and off again and →

again I took as many program courses as
the hospital treatment teams offered me or
as they encouraged me too... So basically
the point out of all of this is that
I attended many-many programs like at the
time of such ways I was at every-offer
end of program through out my time every-
program at least two-three-times-again
over many years as a patient here at The
South West Centre for Forensic Mental
Health Care St. Thomas, Ontario. So again
as I was here I attended every-group
session at least two-times, again over and
over again on and off again! So anyways that
kind of stuff made me feel good or
better and helped me open up the way
I felt and not to say, that probably
is most patients feelings in regards to such
a circumstance as is. But that is some
of the programming offered here at this
hospital, it helps people to think out-
side how they are you-know like a diff-
erent way to feel. But you as every-
thing is I really am good here it is in
a way of feeling like-day-to-day
feelings of feeling like negative about being
in custody or being like on a unit
and not having a normal life or circum-
stance or you-know being like this. But any-
ways having this place definitely helped me
make a difference for me and my self and
for me to see things different as I am so
if it wasn't for this place as the place it
is and the ways of structured opportunity
as to help people like me to understand how
things are for our selves and how to properly
function and how to identify the actual differences

apart of how a imbalance of a reality as to
not normal ways as some people may see things
and or they are! So anyway more on-topic
so I have done over many years of being -
here, I said earlier I literally have done every
program offered here at The South-west
Centre For Forensic Mental Health time & time
again and again or at least twice. So as
things are like that the staff here at the
hospital never again ask me to attend any of the
programs here at the south-west-centre because
as I've again have done all of the programs time-
and-time-again you-know. However, all-in-all
I personally feel very good about things here
at the hospital, and also how every-thing
is here at and for us as us as we are you
know. So again to focus again things of such
as you know as my day-to-day interactions
as a patient here, with the patients daily is
good we basically have our patient unit as it
is as every-unit a secure one as patients need
as they arrive as a new patient we need to go
up the latter of a patient privilege level to
go through a graduated scale of approved
level system! However, it is a good
feeling as we really feel good about how we
are at the positivity or being or doing
good as a patient here. So the hospital
has a level system as we as patients feel good about
and also on a realistic reality a patient can
get privileges and also lose their privileges -
just as fast, all in all you know all the
people here at hospital only desire too
help people to understand their selves and too
properly understand responsibly or a good way to
be for there-selves. Any-how all is good
here at The South West Centre For Forensics -

Mental Health services St. Thomas, Ontario.

So respectfully that ends our communication as such, however thanks for our communication.

However, well good luck too you and your cherished aspects of aspects as your life and career and the best to respectfully you & your family as they are.

Respectfully

See ya Mr. Greg. Procknow.

P.S. If you need any-thing in regards to our ways you know where I am good luck. See ya o...o
